

The bravo palletizer is a machine designed to automate the palletizing of plastic or paper bags to achieve high production. Both the former and the bag unscrambler that are part of this machine allow a great versatility of mosaics to be defined.

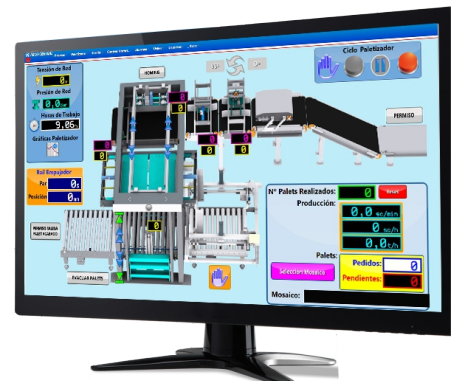

It is fully parameterizable and is controlled by a Touch PC, which allows the operator to handle it easily and quickly.

SOFTWARE PCI PALLETIZER

Software designed to carry out the control and visualization of **High Level Palletizer** of bagging, palletizing and wrapping. Our software has been developed under industry 4.0 standards, including IOT (Internet Of Things) in its operational processes with the aim of achieving greater efficiency and optimization of the process.

- ✓ Process visualization.
- ✓ Graphic curves of consumption and speed.
- ✓ Simple and intuitive handling.
- ✓ 11 predefined mosaics.
- ✓ Real-time alarm notification.
- ✓ Preventive maintenance of all elements.
